Dear Granite Hills Aquatic Committee:

The Granite Hills High School administration, teachers, staff, and students are honored with the prospect that the proposed East County Aquatics Center will be sited on our campus. We look forward to working with the Granite Hills Aquatic Committee, our district and our community as we embark on this project.

We believe this world-class facility will be a huge asset to our community. This multi-use facility would be able to provide low-cost aquatics programs and lessons for children and adults, including the elderly and individuals with handicapping situations.

It will also allow our school the opportunity, for the first time in years, to offer comprehensive aquatics as part of our Physical Education curriculum. We have regretted not having this opportunity for all students because we feel it develops an important mindset of safety in the water, promoting better health for the students, and developing life-long enjoyment of water activities and sports.

We also believe the benefits for our aquatic program, some of the best programs in the county despite not having our own pool, will be incredible. Having a pool on our campus will allow us the opportunity to include even more students in our competitive aquatic programs. Granite Hills already supports some of the largest teams in the county. We are hoping to grow and expand our programs even more when the East County Aquatics Center is built on our campus.

We are appreciative of the community's support in making this dream come true!

Sincerely,
